200 Five-Year Summary

Opinion

In our opinion:

- Genuit Group plc's group financial statements and parent company financial statements
 (the "financial statements") give a true and fair view of the state of the group's and of the parent
 company's affairs as at 31 December 2023 and of the group's profit for the year then ended;
- the group financial statements have been properly prepared in accordance with UK adopted international accounting standards;
- the parent company financial statements have been properly prepared in accordance with UK adopted international accounting standards as applied in accordance with section 408 of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements of Genuit Group plc (the 'parent company') and its subsidiaries (the 'group') for the year ended 31 December 2023 which comprise:

Group	Parent company
Group Balance Sheet as at 31 December 2023	Company Balance Sheet as at 31 December 2023
Group Income Statement for the year then ended	Company Statement of Changes in Equity for the year then ended
Group Statement of Comprehensive Income for the year then ended	Company Cash Flow Statement for the year then ended
Group Statement of Changes in Equity for the year then ended	Related notes 1 to 9 to the financial statements including material accounting policy information
Group Cash Flow Statement for the year then ended	
Related notes 1 to 29 to the financial statements, including material accounting policy information	

The financial reporting framework that has been applied in their preparation is applicable law and UK adopted international accounting standards and as regards the parent company financial statements, as applied in accordance with section 408 of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the group and parent in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard as applied to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

The non-audit services prohibited by the FRC's Ethical Standard were not provided to the group or the parent company and we remain independent of the group and the parent company in conducting the audit.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the directors' assessment of the group and parent company's ability to continue to adopt the going concern basis of accounting included:

- Performing a walkthrough of the Group's financial close process to confirm our understanding
 of management's going concern assessment process and engaging with management to
 ensure all key risk factors we identified were considered in their assessment.
- Obtaining management's going concern assessment including the cashflow forecasts and covenant calculations for the going concern period which covers the 21 month period to 31 December 2025 then performing procedures to confirm the clerical accuracy and appropriateness of the underlying model.
- Obtaining the Group's revolving credit facility and agreeing the level of facilities available,
 the applicable covenants, and the renewal date of August 2027 to management's assessment.
- Assessing the Group's base case scenario for consistency with budgets and cash flow forecasts approved by the Board of Directors and those used by the Group in other accounting estimates such as the goodwill impairment assessment.
- Challenging the appropriateness of the base case assumptions relating to future levels of demand, raw material availability and cost, and future energy prices, including the impact of climate change. Our procedures included analysis of external market data to consider any contradictory sector forecasts, considerations of the current macroeconomic climate and the disclosed climate change commitments of the group.

- Reviewing and reperforming management's stress test of their cashflow forecasts and covenant calculations in order to quantify and then consider the plausibility of the downside scenarios required to exhaust the Group's forecast liquidity or breach the Group's covenant ratios. We specifically considered the quantum of revenue reduction and unrecovered cost inflation required to exhaust liquidity and breach the Group's covenant ratios.
- Considering the impact and feasibility of potential mitigating activities that are within control
 of management, such as reducing capital expenditure and dividend payments.
- Reviewing the Group's going concern disclosures included in the annual report in order to assess their completeness and conformity with the reporting standards.

Our key observations:

- The directors' assessment forecasts that the Group will maintain sufficient liquidity throughout the going concern assessment period in the base case scenario.
- The directors have modelled several downside scenarios including a loss of production, loss
 of a major customer, product failure, recession, increases in interest rates and increases in raw
 material prices. In all scenarios, the Going Concern basis remains appropriate, with no breach
 of covenant or shortfall of liquidity in the Going Concern period.
- The Group has a significant undrawn committed borrowing facility (£120.0m) at the balance sheet date, which is available until August 2027.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group and parent company's ability to continue as a going concern to 31 December 2025.

In relation to the group and parent company's reporting on how they have applied the UK Corporate Governance Code, we have nothing material to add or draw attention to in relation to the directors' statement in the financial statements about whether the directors considered it appropriate to adopt the going concern basis of accounting.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the group's ability to continue as a going concern.

Overview of our audit approach

Audit scope	We performed an audit of the complete financial information of 8 components and audit procedures on specific balances for a further 5 components.
	The components where we performed full or specific audit procedures accounted for 93% of adjusted Profit before tax, 92% of Revenue and 97% of Total assets.
Key audit	Risk of inappropriate revenue recognition arising from manual adjustments.
matters	Risk of inappropriate revenue recognition arising through inaccurate accounting for customer rebates within Building Products.
	Risk of an unrecognised impairment of goodwill within the Adey Cash Generating Unit.
Materiality	Overall group materiality of £3.3m which represents 5% of adjusted Profit before tax.

An overview of the scope of the parent company and group audits Tailoring the scope

Our assessment of audit risk, our evaluation of materiality and our allocation of performance materiality determine our audit scope for each company within the Group. Taken together, this enables us to form an opinion on the consolidated financial statements. We take into account size, risk profile, the organisation of the group and effectiveness of group-wide controls, changes in the business environment, the potential impact of climate change and other factors such as recent Internal audit results when assessing the level of work to be performed at each company.

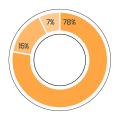

In assessing the risk of material misstatement to the Group financial statements, and to ensure we had adequate quantitative coverage of significant accounts in the financial statements, of the 43 reporting components of the Group, we selected 13 components covering entities within the United Kingdom, which represent the principal Business Units within the Group.

Of the 13 components selected, we performed an audit of the complete financial information of 8 components ("full scope components") which were selected based on their size or risk characteristics. For the remaining 5 components ("specific scope components"), we performed audit procedures on specific accounts within that component that we considered had the potential for the greatest impact on the significant accounts in the financial statements either because of the size of these accounts or their risk profile.

The reporting components where we performed audit procedures accounted for 93% (2022: 95%) of the Group's adjusted Profit before tax, 92% (2022: 90%) of the Group's Revenue and 97% (2022: 95%) of the Group's Total assets. For the current year, the full scope components contributed 78% (2022: 86%) of the Group's adjusted Profit before tax, 80% (2022: 80%) of the Group's Revenue and 94% (2022: 92%) of the Group's Total assets. The specific scope component contributed 15% (2022: 9%) of the Group's adjusted Profit before tax, 12% (2022: 10%) of the Group's Revenue and 3% (2022: 3%) of the Group's Total assets. The audit scope of these components may not have included testing of all significant accounts of the component but will have contributed to the coverage of significant accounts tested for the Group.

Of the remaining 30 components that together represent 7% of the Group's adjusted Profit before tax, none are individually greater than 2% of the Group's adjusted Profit before tax. For these components, we performed review scope procedures which primarily consist of analytical review. For certain locations with statutory audit requirements, we also performed incremental procedures. This included performing data analytics in respect of revenue transactions and manual accounting entries to identify unusual transactions, attendance at stock counts where inventory balances were significant and obtaining external confirmation of cash to respond to any potential risks of material misstatement to the Group financial statements.

The charts below illustrate the coverage obtained from the work performed by our audit teams.

Adjusted Profit before Tax

Full scope components	78.00%
Specific scope components	15.00%
Other procedures	7.00%

Revenue

Full scope components	80.00%
Specific scope components	12.00%
Other procedures	8.00%

Total assets

Full scope components	94.00%
Specific scope components	3.00%
Other procedures	3.00%

Changes from the prior year

The approach to scoping the Group remains in line with prior year. Our approach is in line with EY's audit methodology and International Standards on Auditina (UK)

Involvement with component teams

All audit work performed for the purposes of the audit was undertaken by the Group audit team.

Climate change

Stakeholders are increasingly interested in how climate change will impact Genuit Group plc. The Group has determined that the most significant future impacts from climate change on their operations relate to potential disruption to the supply chain, transition risks relating to carbon taxes and climate reporting obligations and also the market opportunities it presents through the development of low emission and climate resilient products and services. These are explained on pages 31 to 40 in the required Task Force On Climate Related Financial Disclosures and on pages 66 to 73 in the principal risks and uncertainties. They have also explained their climate commitments on pages 22 to 30. All of these disclosures form part of the "Other information," rather than the audited financial statements. Our procedures on these unaudited disclosures therefore consisted solely of considering whether they are materially inconsistent with the financial statements, or our knowledge obtained in the course of the audit or otherwise appear to be materially misstated, in line with our responsibilities on "Other information".

In planning and performing our audit we assessed the potential impacts of climate change on the Group's business and any consequential material impact on its financial statements.

The Group has explained how climate change has been reflected in the financial statements in note 2.2 and note 17, stating that there is no material adverse impact of climate change in the short to medium-term. The 'Other Information' within the Annual Report includes management's assessment of how their long-term climate net-zero aspirations align with the Paris Agreement to achieve net-zero emissions by 2050. There are no significant judgements or estimates relating to climate change in the notes to the financial statements as management has not identified any material short-term impacts from climate change. Note 17 explains that the long-term impact of climate change risks and opportunities are uncertain and are still developing and as such the degree of certainty of all these changes means that they cannot be taken into account when assessing future cashflows under the requirements of UK adopted International Accounting Standards.

Our audit effort in considering the impact of climate change on the financial statements was focused on evaluating management's assessment of the impact of climate risks and opportunities, as described above, and as disclosed on pages 36 to 39 and whether these have been appropriately reflected in asset values where these are impacted by future cash flows. This was relevant for the impairment testing of goodwill following the requirements of UK adopted International Accounting Standards. As part of this evaluation, we performed our own risk assessment, supported by our climate change internal specialists, to determine the risks of material misstatement in the financial statements from climate change which needed to be considered in our audit.

We also challenged the Directors' considerations of climate change risks in their assessment of going concern and viability and associated disclosures. Where considerations of climate change were relevant to our assessment of going concern, these are described above.

Based on our work, whilst we have not identified the impact of climate change on the financial statements to be a standalone key audit matter, we have considered the impact on the following key audit matter: Risk of an unrecognised impairment in the Adey Cash Generating Unit. Details of the impact, our procedures and findings are included in our explanation of key audit matter below.

Key audit matters

Risk

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in our opinion thereon, and we do not provide a separate opinion on these matters.

Inappropriate revenue recognition arising from manual adjustments.

Refer to the Audit Committee Report (page 106); Accounting policies (page 163); and Note 3.1.2 of the Consolidated Financial Statements (page 169)

The Group has reported revenue of £586.5m (2022: £622.2m). Revenue is stated net of rebates payable which are considered in the subsequent key audit matter.

The timing of revenue recognition is relevant to the reported performance of the Group as a whole and also to the completeness of the rebate expense and related year end liabilities. Through manual adjustments, there is the opportunity to misstate revenue between periods in order to influence reported results.

We consider the significant risk to be primarily associated with those components contributing more than 5% of the Group's revenue as any potential error could result in a material misstatement of the Group financial statements.

For the remaining components whilst we consider there to be a risk of management override of controls to misstatement revenue, we do not consider any individual component to represent a significant risk of material misstatement

There has been no change in our assessment of this risk when compared to the prior year.

Our response to the risk

We obtained an understanding of the process and controls in place over the recognition of revenue including approval of manual adjustments recorded as part of the financial statement close process.

We obtained an understanding of the IT systems and the role of IT in initiating, recording and reporting revenue transactions within the Group's accounting systems.

Of the 8 full scope components, 7 components recorded revenue that was material to the Group and are specifically impacted by the identified fraud risk.

For 6 of the 7 full scope components with significant revenue and all specific scope components, representing 89% of the Group's revenues, we used data analytics to analyse the full populations of revenue transactions by correlating sales postings with receivables and cash throughout the year to identify any unusual transactions.

Through this, we identified revenue recognised through manual adjustments or manual journals for targeted testing.

We performed analysis by month to identify unusual trends in revenue and gross margin that could indicate inappropriate revenue recognition.

For the remaining full scope component covering 3% of revenue, we performed tests of detail over revenue recognised in the year by agreeing a representative sample of sales to supporting documentation including proof of delivery and testing related cash receipts throughout the year. We also performed procedures to identify and assess the appropriateness of manual adjustments.

For all full scope components, we inspected a sample of pre and post year-end sales invoices to assess whether they relate to completed deliveries and have been recognised in the correct period.

We performed subsequent review procedures to identify any post year end manual journals impacting the year-end.

For the remaining revenue recorded within Components not subject to direct testing we have performed analytical review procedures and data analytics procedures.

We have reviewed Genuit's Group revenue recognition policy against the requirements of IFRS 15 with a focus on ensuring the performance obligations are appropriately reflected in the Group's approach to recognising revenue.

We assessed the adequacy of the disclosure of revenue within the annual report and accounts.

Key observations communicated to the Audit Committee

Through our procedures performed we have not identified any unsupported manual adjustments to revenue, or any unexplained anomalies from our revenue analytics.

No significant manual adjustments or unusual accounting entries were identified through our testing.

No material errors in the timing of revenue recognition were identified.

We concluded that revenue recognised in the year is appropriate and found no evidence of management bias.

Risk

Independent Auditor's Report to the Members of Genuit Group plc continued

Inappropriate revenue recognition arising through inaccurate accounting for customer rebates within Building Products.

Refer to the Audit Committee Report (page 106); Accounting policies (page 163); and Note 3.1.2 of the Consolidated Financial Statements (page 169)

The total value of customer rebates recognised in the year and accrued for at the balance sheet date is material

The Group's pricing structure includes rebate arrangements with customers. Many of these arrangements are relatively straightforward, being based on agreed percentages of sales made to direct customers during the period.

A proportion of the Group's rebate agreements are with indirect customers and estimation is required when determining the rebate accrual at the balance sheet date. This is particularly the case for indirect rebates within the Sustainable Business Solutions operating segment (Building Products business) where the rebate is driven by claims which may not have been received or verified at the time when the liabilities are recognised. These claims are made on the basis of installations in line with specification rather than purchases from the Group.

There has been no change in our assessment of this risk when compared to the prior year.

Our response to the risk

We obtained an understanding of management's process and controls in place over recognition and recording of rebates, including key assumptions such as volumes and related targets and claim compliance rates for Developers.

We obtained an understanding of the IT systems and the role of IT in initiating, recording and reporting rebate transactions within the Group's accounting systems.

We reviewed significant, new and existing rebate agreements and tested a sample of payments made during the year in order to validate the charges incurred and settled during the year.

We utilised data analytics to identify unusual transactions recorded in rebate accounts that could indicate management override of controls.

For Developer rebates, we reviewed external information to develop our own point estimate of the year-end rebate. We tested the accuracy of quarterly estimates made by management against actual claim amounts. We tested the compliance rates of actual claims received to understand the value of claims that were subsequently paid out during the year.

For Merchant rebates, we developed an independent expectation of the annual rebate charge and year end liability, including any charge associated with targeted rebate clauses, and compared this to management's annual charge and year end liability.

We performed completeness procedures on the year end rebate held by comparing a sample of customers who claimed during the year to the rebate charge and closing balance.

We reviewed material post year end bank payments and claims received and compared these to management's year end estimates.

For Merchant rebates, we compared the 2023 charge from the December 2023 schedule to the 2023 charge from the January 2024 schedule to understand changes to the rebate charge that were made subsequent to the year-end.

We compared the prior year accrual to the actual claims verified and paid in the year to understand the historical accuracy of management's estimation.

Key observations communicated to the Audit Committee

We concluded that management's judgments were materially consistent with our expectations and recalculations based on external sources, post year end claim activity and historic settlement rates.

We concluded that the rebate expense recognised during the year and the liability at the period end is appropriate.

for sensitivity disclosures.

Independent Auditor's Report to the Members of Genuit Group plc continued

Key observations communicated to the Audit Committee Risk Our response to the risk Risk of an unrecognised impairment of goodwill We assessed the appropriateness of the individual CGU's identified in line with IAS 36. We consider management's within the Adey Cash Generating Unit (CGU) assessment appropriately reflects the We walked through and understood management's approach to the goodwill impairment requirements of IAS 36 and captures Refer to the Audit Committee Report (page 106); assessment and walked through the Groups budgeting process to understand the key the risks to future cashflows. Accounting policies (page 163); and Note 3.2.1 of the assumptions made in the budget. This included confirming the underlying cash flows are consistent with the Board approved business plan and appropriately consider the effects Consolidated Financial Statements (page 169) We concluded that the carrying value of material climate risks as disclosed on pages 36 to 39. of the goodwill recognised in the Adey There is a risk that there is an unrecognised impairment Cash Generating Unit was appropriate. against goodwill within the Adey CGU. The forecasts in We obtained an understanding of the role of IT in the goodwill impairment assessment process, the CGU are highly sensitive to key assumptions including including the source of underlying data. the revenue growth rates, margin assumptions and We assessed whether the model is prepared in accordance with IAS 36 and we utilised out discount rate valuation specialists to support in our assessment of the appropriateness of Management's discount rate and methodology. We challenged the long-term growth rate within the discounted cashflow calculations. We understood and challenged Management's forecast future cashflows, to assess key inputs and to compare these against industry expectations. We challenged the assumptions underpinning the growth rates, including the expected recovery following recent market decline, considerations over economic uncertainty in the short-term and how the medium to longer-term risks and opportunities were factored in to future cashflows. This included assessment of how Management incorporated the opportunities presented by climate change in the long-term growth rates. We challenged the forecast cost assumptions, to assess that the forecasts were reasonable and in line with IAS 36.

In the prior year, our auditor's report included a key audit matter in relation to the risk of an unrecognised impairment in the Climate & Ventilation Cash Generating Unit. In the current year, no specific indicators of impairment have been identified in respect of this Cash Generating Unit.

We audited the disclosures in accordance with IAS 36 and IAS 1, including the requirement

Our application of materiality

We apply the concept of materiality in planning and performing the audit, in evaluating the effect of identified misstatements on the audit and in forming our audit opinion.

Materiality

The magnitude of an omission or misstatement that, individually or in the aggregate, could reasonably be expected to influence the economic decisions of the users of the financial statements. Materiality provides a basis for determining the nature and extent of our audit procedures.

We determined materiality for the Group to be £3.3 million (2022: £3.7 million), which is 5% (2022: 5%) of adjusted Profit before tax. We believe that adjusted Profit before tax provides us with a consistent basis for calculating materiality as it excludes the impact of one-off items that are not related to the underlying operations of the Group.

We determined materiality for the Parent Company to be £3.1 million (2022: £3.7 million), which is 1% (2022: 1%) of total equity.

Starting basis - Group profit before tax - £48.4 million.

Adjustments – Adjusted for non-underlying items excluding amortisation or acquired intangible assets

Materiality

- Totals £65.7m Group adjusted profit before tax
- Materiality of £3.3m (5% of Group's adjusted profit before tax)

During the course of our audit, we reassessed initial materiality with the only change in the final materiality from our original assessment, being to reflect the actual reported performance of the Group in the year.

Performance materiality

The application of materiality at the individual account or balance level. It is set at an amount to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

On the basis of our risk assessments, together with our assessment of the Group's overall control environment, our judgement was that performance materiality was 75% (2022: 75%) of our planning materiality, namely £2.5m (2022: £2.8m). We have set performance materiality at this percentage due to our assessment of the control environment and assessment that there is a lower likelihood of misstatements.

Audit work at component locations for the purpose of obtaining audit coverage over significant financial statement accounts is undertaken based on a percentage of total performance materiality. The performance materiality set for each component is based on the relative scale and risk of the component to the Group as a whole and our assessment of the risk of misstatement at that component. In the current year, the range of performance materiality allocated to components was £0.5m to £2.2m (2022: £0.5m to £2.2m).

Reporting threshold

An amount below which identified misstatements are considered as being clearly trivial.

We agreed with the Audit Committee that we would report to them all uncorrected audit differences in excess of £0.2m (2022: £0.2m), which is set at 5% of planning materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds.

We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

Other information

The other information comprises the information included in the annual report set out on pages 1 to 147, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, the part of the directors' remuneration report to be audited has been properly prepared in accordance with the Companies Act 2006.

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements and those reports have been prepared in accordance with applicable legal requirements;
- the information about internal control and risk management systems in relation to financial reporting processes and about share capital structures, given in compliance with rules 7.25 and 7.26 in the Disclosure Rules and Transparency Rules sourcebook made by the Financial Conduct Authority (the FCA Rules), is consistent with the financial statements and has been prepared in accordance with applicable legal requirements; and
- information about the company's corporate governance statement and practices and about its administrative, management and supervisory bodies and their committees complies with rules 7.2.2.7.2.3 and 7.2.7 of the FCA Rules.

Strategic Report

Independent Auditor's Report to the Members of Genuit Group plc continued

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the group and the parent company and its environment obtained in the course of the audit, we have not identified material misstatements in:

- the strategic report or the directors' report; or
- the information about internal control and risk management systems in relation to financial reporting processes and about share capital structures, given in compliance with rules 7.2.5 and 7.2.6 of the FCA Rules.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements and the part of the Directors' Remuneration Report to be audited are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit; or
- a Corporate Governance Statement has not been prepared by the company.

Corporate Governance Statement

We have reviewed the directors' statement in relation to going concern, longer-term viability and that part of the Corporate Governance Statement relating to the group and company's compliance with the provisions of the UK Corporate Governance Code specified for our review by the Listing Rules.

Based on the work undertaken as part of our audit, we have concluded that each of the following elements of the Corporate Governance Statement is materially consistent with the financial statements or our knowledge obtained during the audit:

- Directors' statement with regards to the appropriateness of adopting the going concern basis of accounting and any material uncertainties identified set out on page 113;
- Directors' explanation as to its assessment of the company's prospects, the period this assessment covers and why the period is appropriate set out on page 113;
- Director's statement on whether it has a reasonable expectation that the group will be able to continue in operation and meets its liabilities set out on page 113;
- Directors' statement on fair, balanced and understandable set out on page 109;
- Board's confirmation that it has carried out a robust assessment of the emerging and principal risks set out on page 66 to 73;
- The section of the annual report that describes the review of effectiveness of risk management and internal control systems set out on page 90; and;
- The section describing the work of the audit committee set out on pages 106 to 112.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement set out on page 116, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group and parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the company and management.

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the group and determined that the most significant are frameworks which are directly relevant to specific assertions in the financial statements are those that relate to the reporting framework (UK adopted international accounting standards, the Companies Act 2006 and UK Corporate Governance Code). In addition, we concluded that there are certain significant laws and regulations which may have an effect on the determination of the amounts and disclosures in the financial statements including the relevant tax compliance regulations in the UK and those laws and regulations relating to health and safety and employee matters.

Strategic Report

Independent Auditor's Report to the Members of Genuit Group plc continued

- We understood how Genuit Group plc is complying with those frameworks by making enquiries of Group and Component management, as well as those charged with governance. We corroborated our enquiries through our review of board minutes and papers provided to the Audit Committee. Further, through our detailed audit procedures we have considered whether any evidence has been identified that indicates non-compliance with the relevant laws and regulations has occurred.
- We assessed the susceptibility of the group's financial statements to material misstatement, including how fraud might occur by understanding the Group's performance against market expectations; understanding the Group's performance against internal key performance indicators used when calculating management's variable remuneration; identifying key judgments and estimates including rebate accounting that can materially impact the financial statements; and understanding the controls and processes in place for the prevention and detection of fraudulent activity and financial reporting.
- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved those outlined in the revenue and rebate key audit matters above, as well as testing manual journals recorded at the component and consolidation level and understanding unusual and one-off transactions. Where relevant, we have corroborated the basis of accounting judgements and estimates with employees and specialists outside of the finance functions such as the Company Secretary, the Group IT function, the Group Legal function, commercial management and through reading any correspondence with regulatory bodies.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Other matters we are required to address

- Following the recommendation from the audit committee, we were appointed by the company in 2012 to audit the Group's financial statements for the year ending 31 December 2012 and subsequent financial periods. In 2014, upon the Group's listing on the London Stock Exchange the Group became subject to the rotation requirements under the UK Corporate Governance Code, Competition and Markets Authority and the EU Audit Directive.
- The period of total uninterrupted engagement since the Group was subject to these rotation requirements is 10 years. In total the period of uninterrupted engagement including previous renewals and reappointments is 12 years, covering the years ending 31 December 2012 to 31 December 2023.
- Following a competitive tender process during 2023, we were reappointed as auditor of the Company for the period ending 31 December 2024 and subsequent financial periods. The audit opinion is consistent with the additional report to the audit committee.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Mark Morritt (Senior statutory auditor) for and on behalf of Ernst & Young LLP, Statutory Auditor Leeds 12 March 2024

Notes to the Group Financial Statements

For the year ended 31 December 2023

1. Authorisation of financial statements

The consolidated financial statements of the Group for the year ended 31 December 2023 were authorised for issue by the Board of Directors on 12 March 2024 and the balance sheet was signed on the Board's behalf by Joe Vorih and Tim Pullen.

Genuit Group plc (previously known as Polypipe Group plc) is a public limited company incorporated and domiciled in England and Wales. The principal activity of the Group is the provision of sustainable water and climate management solutions for the built environment.

2. Summary of material accounting policies

The basis of preparation and accounting policies used in preparing the consolidated historical financial information for the year ended 31 December 2023 are set out below. These accounting policies have been consistently applied in all material respects to all the periods presented.

2.1 Basis of preparation and statement of compliance with IFRSs

The Group's consolidated financial statements have been prepared in accordance with UK-adopted International Accounting Standards (UK-adopted-IAS).

The accounting policies which follow set out those policies which apply in preparing the consolidated financial statements for the year ended 31 December 2023.

The Group's consolidated financial statements have been prepared on a historical cost basis except for derivative financial instruments and deferred and contingent consideration that have been measured at fair value. The consolidated financial statements are presented in Pounds Sterling and all values are rounded to one decimal place of a million (£m) unless otherwise indicated.

2.2 Going concern

The Directors have made enquiries into the adequacy of the Group's financial resources, through a review of the Group's budget and medium-term financial plan, including cash flow forecasts. The Group has modelled a range of scenarios, with the base forecast being one in which, over the 24 months ending 31 December 2025, sales volumes grow in line with or moderately above external construction industry forecasts.

In addition, the Directors have considered several downside scenarios, including adjustments to the base forecast, a period of significantly lower like-for-like sales, profitability and cash flows. Consistent with our Principal Risks and Uncertainties these downside scenarios included, but were not limited to, loss of production, loss of a major customer, product failure, recession, increases in interest rates and increases in raw material prices. Downside scenarios also included a combination of these risks, and reverse stress testing.

The financial impact of the climate-related risks disclosed within the Task Force on Climate-Related Financial Disclosures Report on pages 31 to 40 of the Strategic Report continue to be assessed. The Directors conclude that there is no material adverse impact of climate change in the short to medium-term, and hence have not included any impacts in either the base case or downside scenarios of the going concern assessment. The Group has not experienced material adverse disruption during periods of adverse or extreme weather in recent years and do not expect this to occur to a material level over the period of the going concern assessment.

At 31 December 2023, the Group had available £230.0m of undrawn committed borrowing facilities in respect of which all conditions precedent had been met. These borrowing facilities are available until at least August 2027, subject to covenant headroom. The Directors are satisfied that the Group has sufficient liquidity and covenant headroom to withstand reasonable variances to the base forecast, as well as the downside scenarios. In addition, the Directors have noted the range of possible additional liquidity options available to the Group, should they be required.

As a result, the Directors have satisfied themselves that the Group has adequate financial resources to continue in operational existence for a period of at least the next 21 months. Accordingly, they continue to adopt the going concern basis in preparing the consolidated financial statements.

2.3 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Group and its subsidiaries at 31 December 2023. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Group controls an investee if, and only if, the Group has:

- power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

The Group holds 100% of the equity and controls 100% of the voting rights in all subsidiaries, with the exception of Equaflow Ltd, Sustainable Water and Drainage Systems BV, Sustainable Water and Drainage Systems Limited and Water Management Solutions LLC (which has not traded since incorporation in Qatar in 2015).

In relation to the acquisition of Plura Composites Limited and related entities, under the terms of the acquisition, the group originally acquired 51% with an option to acquire the remaining 49% which was exercised during the year on 8 December 2023. Under the contractual arrangements, prior to exercising the option, the Group's approval is required for all major operational decisions. Based on this, the Group has accounted for Plura Composites Limited as a wholly owned subsidiary for the full year and prior year because the call option over the remaining shares gave the Group present access to returns over all the shares held by non-controlling shareholders.

The treatment of non-controlling interests or any other non-voting right factors in respect of control is not material to the consolidated financial statements.

2. Summary of material accounting policies continued

2.4 Business combinations

Business combinations are accounted for using the acquisition method. The cost of an acquisition is the total of the consideration transferred, measured at acquisition fair value. Acquisition costs incurred are expensed and included in administration expenses in the income statement.

Identifiable intangible assets, meeting either the contractual-legal or separability criterion are recognised separately from goodwill.

2.4.1 Goodwill

Goodwill arises on business combinations and represents the excess of the cost of an acquisition over the fair value of the Group's share of the identifiable assets, liabilities and contingent liabilities acquired.

After initial recognition, goodwill is stated at cost less any accumulated impairment losses (see Note 213).

Goodwill has specific characteristics for impairment and is tested annually (at 31 December) or when circumstances indicate that the carrying amount may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each cash generating unit (CGU) to which the goodwill relates. Each CGU or group of CGUs to which goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes and is not larger than an operating segment before aggregation. An impairment loss is recognised if the carrying amount of a CGU is determined to be greater than its recoverable amount. The recoverable amount of a CGU is the higher of its fair value less costs to sell and its value-in-use. If an impairment is identified the carrying value of the goodwill is written down immediately through the income statement and this is not subsequently reversed.

2.4.2 Other intangible assets

Intangible assets arising on business combinations are initially measured at fair value. Following initial recognition, intangible assets are carried at cost or fair value less accumulated amortisation and accumulated impairment losses, if any. The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortised on a straight-line basis over their expected useful life and are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

Amortisation of intangible assets is provided over the following expected useful lives:

Patents and brand names	10 to 20 years
Customer relationships and customer order book	5 to 20 years
Licences	10 years
Development costs	4 to 10 years

2.5 Foreign currency translation

The Group's consolidated financial statements are presented in Pounds Sterling, which is also the Parent Company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured in that functional currency.

Transactions in foreign currencies are initially recognised by the Group entities at their respective functional currency rates prevailing at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency spot rate of exchange at the balance sheet date. All differences arising on settlement or translation are taken to the income statement.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

The assets and liabilities of foreign operations are translated into Pounds Sterling at the rate of exchange ruling at the balance sheet date. Income and expenses are translated at average exchange rates prevailing. The resulting exchange differences are recognised in other comprehensive income.

2.6 Revenue from contracts with customers and interest income

Revenue from contracts with customers is recognised when control of the goods is transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled to in exchange for those goods. The disclosure of significant accounting judgements and estimates relating to revenue from contracts with customers is provided in Note 3.

2.6.1 Sale of goods

i) Performance obligations

Revenue from sale of goods is recognised at the point in time when control of the goods is transferred to the customer, generally on delivery of the goods. Our most commonly used standard payment terms are 30 days net end of month.

The main source of variable consideration in our contracts with customers relates to volume rebates. More information is on the accounting for rebates is provided at (ii) and (iii) below. The Group's contracts do not typically include a significant financing component. Non-cash consideration is not a feature of the Group's contractual arrangements.

ii) Variable consideration

If the consideration in a sales contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved. Some sales contracts provide customers with sales volume rebates. The sales volume rebates give rise to variable consideration.

iii) Sales volume rebates

The Group provides retrospective sales volume rebates to certain customers once, amongst other matters, the quantity of goods purchased during a predetermined period exceeds thresholds specified in the sales contract. To estimate the variable consideration for these expected future rebates, the Group applies the most likely amount method for sales contracts with a single-volume threshold and the expected value method for sales contracts with more

2. Summary of material accounting policies continued

iii) Sales volume rebates continued

than one volume threshold. The selected method that best predicts the amount of variable consideration is primarily driven by the number of volume thresholds contained in the sales contract. The Group then applies the requirements on constraining estimates of variable consideration and recognises a refund liability for the expected future rebates. Sales volume rebate liabilities, both estimated and actual, are netted off against the associated trade receivables to the extent of the individual customer trade receivable balance and where they are net settled. Any remaining credit balances are included in trade and other payables. Developer rebate liabilities are presented in trade and other payables.

2.7 Interest income

Interest income is recognised as interest accrues on cash balances using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to its net carrying amount.

2.8 Income taxes

Current income tax

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the tax authorities, based on income tax rates and laws enacted or substantively enacted at the balance sheet date.

Deferred income tax

Deferred income tax is recognised on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements, with the following exceptions:

- where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- in respect of taxable temporary differences associated with investments in subsidiaries, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future; and
- deferred income tax assets are recognised only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, carried forward tax credits or tax losses can be utilised.

For deductible temporary differences associated with investments in subsidiaries it must additionally be probable that the temporary differences will reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date. Deferred income tax assets and liabilities are offset only if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred income taxes relate to the same tax authority and that authority permits the Group to make a single net payment.

Deferred income tax assets and liabilities are measured on an undiscounted basis at the income tax rates that are expected to apply when the asset is realised or the liability is settled, based on income tax rates and laws enacted or substantively enacted at the balance sheet date.

Income tax is charged or credited to other comprehensive income if it relates to items that are charged or credited to other comprehensive income. Similarly, income tax is charged or credited directly to equity if it relates to items that are charged or credited directly to equity. Otherwise, income tax is recognised in the income statement.

2.9 Property, plant and equipment

Property, plant and equipment is stated at cost less accumulated depreciation and accumulated impairment losses, if any. Cost comprises the aggregate amount paid and the fair value of any other consideration given to acquire the asset and includes costs directly attributable to making the asset capable of operating as intended.

Depreciation is provided on the cost less residual value of property, plant and equipment, and is on a straight-line basis over its expected useful life as follows:

Freehold land	Nil
Freehold buildings	Over expected useful life not exceeding 50 years
Plant and other equipment	4 to 20 years

The carrying amounts of property, plant and equipment are reviewed for impairment if events or changes in circumstances indicate the carrying amount may not be recoverable, and are written down immediately to their recoverable amount. Useful lives, residual values and depreciation methods are reviewed at each financial year end, and where adjustments are required, these are made prospectively.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or where no future economic benefits are expected to arise from the continued use of the asset. Any profit or loss arising on the derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

2.10 Software as a Service (SaaS)

Under Software as a Service arrangements the Group does not currently control the underlying software used in the agreement. These arrangements are accounted for as a service contract and expensed in the Group income statement over the contract term, unless the Group has both a contractual right to take possession of the software at any time, and the ability to run the software independently of the host vendor. In such cases, the licence agreement is capitalised as software within intangible assets.

The Group's policy in relation to costs incurred to configure or customise the software to specific requirements is as follows:

 where costs incurred result in the creation of a separately identifiable resource controlled by the Group, and where the Group has the power to obtain the future economic benefit flowing from the underlying resource, such costs are capitalised as software within intangible assets;

2. Summary of material accounting policies continued

where costs incurred do not result in the recognition of an intangible asset then the costs are
expensed as incurred. Costs are included within non-underlying items in the income statement
if they relate to significant strategic projects and are considered to meet the Group's definition
of non-underlying items.

2.11 Research and development costs

Research costs are expensed as incurred. Development expenditures on individual projects are recognised as an intangible asset when the Group can demonstrate:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- its intention to complete and its ability to use or sell the asset;
- how the asset will generate future economic benefits;
- the availability of resources to complete the asset; and
- the ability to measure reliably the expenditure during development.

Other internally generated intangible assets are not capitalised and expenditure is reflected in the income statement in the year in which the expenditure is incurred.

2.12 Assets classified as held-for-sale

Assets classified as held-for-sale are measured at the lower of carrying amount and fair value, less costs to sell. Assets are classified as held-for-sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable, expected to be completed within one year from the date of classification and accordingly included in current assets with the associated liabilities being included in current liabilities, and the asset is available for immediate sale in its present condition.

2.13 Impairment of non-financial assets

The Group assesses at each balance sheet date whether there are any indicators that an asset may be impaired.

If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount in order to determine the extent of the impairment loss. The recoverable amount of an asset or CGU is the higher of its fair value less costs to sell and its value-in-use and it is determined for an individual asset, unless the asset does not generate cash flows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value-in-use, the estimated future pre-tax cash flows are mid-year discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators

The Group bases its impairment calculations on detailed budgets and industry forecast calculations which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and industry forecast calculations are generally covering a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses are recognised in the income statement in those expense categories consistent with the function of the impaired asset.

2.14 Leasing

Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e. the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its expected useful life and the lease term. Right-of-use assets are subject to impairment.

Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments or a change in the assessment to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered of low value. Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

Determining the lease term of contracts with renewal options

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

Strategic Report

Notes to the Group Financial Statements continued

2. Summary of material accounting policies continued

The Group has the option, under some of its leases, to lease the assets for additional terms. The Group applies judgement in evaluating whether it is reasonably certain to exercise the option to renew. That is, it considers all relevant factors that create an economic incentive for it to exercise the renewal. After the commencement date, the Group re-assesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew (e.g. a change in business strategy).

2.15 Financial instruments – initial recognition and subsequent measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

i) Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income, or fair value through profit or loss (FVTPL).

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not recognised at FVTPL, transaction costs. Trade receivables that do not contain a significant financing component are measured at the transaction price determined under IFRS 15.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

The Group's financial assets include cash and cash equivalents and trade and other receivables.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification. The Group does not currently hold any fair value through other comprehensive income financial assets.

Financial assets at amortised cost

The Group measures financial assets at amortised cost if both of the following conditions are met:

- the financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Group's financial assets at amortised cost includes cash and cash equivalents and trade receivables.

Impairment

The Group recognises an allowance for expected credit losses (ECLs) for all financial assets not held at FVTPL ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate.

For trade receivables, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each balance sheet date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the receivables and the economic environment.

ii) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at FVTPL, loans and borrowings, payables, lease liabilities or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, lease liabilities, deferred and contingent consideration, loans and borrowings including bank overdrafts, and derivative financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Derivative financial instruments are classified as FVTPL unless they are designated as effective hedging instruments. Gains and losses on such derivatives are recognised in the income statement. However, in the current and prior period all derivatives have been designated as hedging instruments in effective hedging relationships. Further information on their accounting is provided at 2.16 below. As such, the only financial liability at FVTPL is the deferred and contingent consideration (see Note 18).

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method. Profits and losses arising on the repurchase, settlement or otherwise cancellation of liabilities are recognised in finance revenues and finance costs, respectively.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts, together with any costs or fees incurred, is recognised in the income statement.

2. Summary of material accounting policies continued

iii) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.16 Derivative financial instruments and hedge accounting

The Group uses derivative financial instruments to hedge its foreign currency risks. The Group does not use derivative financial instruments for speculative purposes.

Derivatives are initially recognised at fair value on the date a derivative contract is entered into, and they are subsequently remeasured to their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument and, if so, the nature of the item being hedged. For the purpose of hedge accounting, hedges are classified as:

Cash flow hedges when hedging the exposure to variability in cash flows that is either
attributable to a particular risk associated with a recognised asset or liability or a highly probable
forecast transaction or the foreign currency risk in an unrecognised firm commitment.

Cash flow hedge

Cash flow hedging matches the cash flows of hedged items against the corresponding cash flows of the derivative. The effective part of any profit or loss on the derivative is recognised directly in other comprehensive income and the hedged item is accounted for in accordance with the policy for that financial instrument. Any ineffective part of any profit or loss is recognised immediately in the income statement. Amounts taken to other comprehensive income are transferred to the income statement when the hedged transaction affects profit or loss, such as when a forecast sale or purchase occurs.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. At that time, any cumulative profit or loss on the hedging instrument recognised in equity is retained in equity until the forecast transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative profit or loss recognised in equity is transferred to the income statement for the period.

Note 29 sets out the details of the fair values of the derivative financial instruments used for hedging purposes.

2.17 Fair values

The Group measures financial instruments, such as derivatives, at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between the market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability; or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group. The fair value of financial instruments that are traded in active markets at the balance sheet date is determined by reference to quoted market prices or dealer price quotations, without any deduction for transaction costs.

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include using recent arm's length market transactions; reference to the current fair value of another instrument that is substantially the same; discounted cash flow analysis; or other valuation models.

An analysis of fair values of financial instruments and further details as to how they are measured are provided in Note 29.

2.18 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost includes all costs incurred in bringing each product to its present location and condition, as follows:

- Raw materials purchase cost on a first in, first out basis.
- Work in progress and finished goods cost of direct materials and labour plus attributable overheads based on a normal level of activity.

Net realisable value is based on estimated selling price less any further costs expected to be incurred to completion and disposal.

2.19 Cash and short-term deposits

Cash and short-term deposits consist of cash at bank and in hand.

2.20 Pensions

The Group operates defined contribution pension plans. Contributions payable in the year are charged to the income statement. The assets are held separately from those of the Group in an independently administered fund. Differences between contributions payable in the year and contributions actually paid are shown as either accruals or prepayments in the balance sheet.

2.21 Non-underlying items

The Group presents amortisation and impairment of intangible assets arising on business combinations, the un-wind of inventory fair value adjustments resulting from acquisitions, significant profit on disposal of property, plant and equipment, restructuring costs, non-recurring operating costs and tax, as non-underlying items on the face of the income statement. These are items of income and expense which, because of the nature and expected infrequency of the events giving rise to them, the Directors consider merit separate presentation to provide a better and more consistent indication of the Group's underlying financial performance and a more meaningful comparison with prior and future periods to assess trends in financial performance. The tax effect of the above is also included.

2. Summary of material accounting policies continued

2.22 Share-based payments

In the case of equity-settled schemes, the fair value of options granted is recognised as an employee expense with a corresponding increase in equity. The fair value is measured at the date of grant and spread over the period during which the employees become unconditionally entitled to the options. The value of the options is measured using the Black–Scholes and Monte Carlo models, taking into account the terms and conditions (including market and non-vesting conditions) upon which the options were granted. Non-market vesting conditions are taken into account by adjusting the number of equity instruments expected to vest at each balance sheet date so that, ultimately, the cumulative amount recognised over the vesting period is based on the number of options that eventually vest. No expense is recognised for awards that do not ultimately vest, except for equity-settled transactions where vesting is conditional upon a market or non-vesting condition, which are treated as vesting irrespective of whether or not the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

2.23 Cash dividend

The Group recognises a liability to pay a dividend when the distribution is authorised and the distribution is no longer at the discretion of the Group. Under UK company law a distribution is authorised when it is approved by the shareholders. A corresponding amount is then recognised directly in equity.

2.24 Own shares

The Group operates an Employee Benefit Trust (EBT). The Group and/or the EBT, holds Genuit Group plc shares for the granting of Genuit Group plc shares to employees and Directors. These shares are recognised at cost and presented in the balance sheet as a deduction from equity. No profit or loss is recognised in the income statement on the purchase, sale, issue or cancellation of these shares. No dividends are earned on these shares, and they are ignored for the purposes of calculating the Group's earnings per share.

2.25 Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Restructuring provisions are recognised only when the Group has a constructive obligation, which is when a detailed formal plan identifies the business or part of the business concerned, the location and number of employees affected, a detailed estimate of the associated costs, and an appropriate time line, and the employees affected have been notified of the plan's main features.

3. Judgements and key sources of estimation uncertainty

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions in applying the Group's accounting policies to determine the reported amounts of revenue, expenses, assets and liabilities, and the accompanying disclosures. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. The estimates and underlying assumptions are reviewed on an ongoing basis, with revisions to accounting estimates applied prospectively.

3.1 Critical accounting judgements

Critical judgements, apart from those involving estimations, that are applied in the preparation of the consolidated Group financial statements in the years ended 31 December 2023 and 2022 are discussed below:

3.1.1 Business combinations

The measurement of fair values on a business combination requires the recognition and measurement of the identifiable assets, liabilities and contingent liabilities. The key judgements involved are the identification of which intangible assets meet the recognition criteria as set out in IAS 38, the fair values attributable to those intangible assets, and the useful lives of individual intangible assets. The Group has applied judgement in determining whether amounts contingently payable to previous owners of the businesses we have acquired should be recognised as a remuneration cost in the income statement, or within total consideration that is allocated to the fair value of assets and liabilities included in the balance sheet.

3.1.2 Revenue recognition and customer rebates

The Group's pricing structure involves rebate arrangements with several of its direct and indirect customers. These can be complex in nature and involve estimation in determining the required level of provision for rebate liabilities, particularly where the Group is reliant on information from customers which may not be available at the time the liabilities are assessed.

3.2 Key sources of estimation uncertainty

The key assumptions about the future, and other key sources of estimation uncertainty at the reporting period end, that may have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year are discussed below:

3.2.1 Impairment of non-financial assets

Non-financial assets include goodwill, other intangible assets and property, plant and equipment. In accordance with IFRS, the Group considers whether there are any indicators of impairment of these assets. Where indicators of impairment are identified, the Group tests the asset for impairment. Goodwill is tested for impairment annually (at 31 December) or more frequently when circumstances indicate that the carrying amount may be impaired.

3. Judgements and key sources of estimation uncertainty continued

The Group's impairment test for goodwill is based on a value-in-use calculation, using a cash flow model with mid-year discounting applied. The aim of the test is to ensure that goodwill is not carried at a value greater than the recoverable amount. The cash flows are derived from the budgets and forecasts for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the performance of the asset or the CGU. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash flows and the growth rate used for extrapolation purposes. The key assumptions used to determine the recoverable amount for the different CGUs are further explained in Note 17.

3..2.2 Contingent consideration

The Directors assess the likelihood that financial targets will be achieved in order to trigger the contingent consideration to the previous owners of the businesses we have acquired, to quantify the possible range of that contingent consideration, and to how that contingent consideration should be calculated and disclosed in the consolidated financial statements. Due to the inherent uncertainty in this process, actual liabilities may be different from those originally estimated.

3.3 Climate change

In preparing the consolidated financial statements The Group has considered the impact of both physical and transition climate change risks as well as its plans to mitigate against those risks on the current valuation of its assets and liabilities. The Group does not believe that there is a material impact on the financial reporting judgements and estimates arising from our considerations and as a result the valuations of our assets or liabilities have not been significantly impacted by these risks as at 31 December 2023.

In coming to this conclusion, the Group has reviewed the balance sheet and identified those line items that have the potential to be significantly impacted by climate-related risks and the plans to mitigate against these risks. The line items that have the potential to be significantly impacted have then been reviewed in detail to confirm:

 The growth rates and projected cash flows, used in assessing whether the goodwill and indefinite-life intangibles are impaired, are consistent with the climate-related risk assumptions and the actions being taken to mitigate against those risks.

4. New and amended accounting standards and interpretations

Accounting standards or interpretations which have been adopted in the year

There were no accounting standards or interpretations that have become effective in the year which had an impact on disclosures, financial position or performance.

Accounting standards or interpretations issued but not yet effective

There were no accounting standards or interpretations issued which have an effective date after the date of these consolidated financial statements that the Group reasonably expects to have an impact on disclosures, financial position or performance.

5. Segment information

IFRS 8, Operating Segments, requires operating segments to be identified on the basis of the internal financial information reported to the Chief Operating Decision Maker (CODM). The Group's CODM is deemed to be the Board of Directors, which is primarily responsible for the allocation of resources to segments and the assessment of performance of the segments.

From 1 January 2023, reporting segments have been aligned with the Group's Sustainable Solutions for Growth strategy and reorganised into three segments – Sustainable Building Solutions (SBS), Water Management Solutions (WMS) and Climate Management Solutions (CMS). Adey, Nuaire, Domus, Nu-Heat and Surestop have been reallocated from the Residential Systems segment into CMS, with the remainder of Residential Systems moving into SBS. The Commercial and Infrastructure segment is now reported as WMS without the commercial element of Nuaire which is now reported in CMS. The reporting segments are organised based on the nature of the end markets served. Inter-segment sales are on an arm's length basis in a manner similar to transactions with third parties. The prior year comparatives have been restated to the three divisions. Other segments relates to Polypipe Italia SRL which is currently held-for-sale and not reported as part of the Group's strategic business units.

					2023
	Sustainable Building Solutions £m	Water Management Solutions £m	Climate Management Solutions £m	Other £m	Total £m
Segmental revenue	268.0	193.9	169.2	8.4	639.5

Total non-underlying items	32.1	(8.0)	24.1	45.2	(5.2)	40.0

Restructuring costs incurred in both periods are in relation to the reorganisation of the Group, which concluded during 2023, with a cumulative cost over the two-year period of £24.6m. The Group reviewed its operating footprint which resulted in the closure of six sites. This included the sale of two properties which accounts for the profit on disposal, reorganisation costs in relation to the new operating structure of the segmental units (see Note 3) and costs incurred for consultancy fees for advisory support as part of the initial deployment and design of the Genuit Business System. Workday SaaS costs related to the design and configuration of Workday software that is a significant project to support the Group's medium-term strategy.

8. Non-underlying items continued

The product liability claim is associated with a historic acquisition and comprised of an increase in the provision for remediation works which have been ongoing in 2023. The total amount recognised as a liability on the balance sheet for the remaining works at 31 December 2023 is £1.3m (2022: £3.3m). This is offset by a settlement being received, net of legal costs incurred, associated with the acquisition.

Acquisition costs in both years relate predominantly to a £1.8m (2022: £3.1m) charge arising in connection with contingent consideration treated as remuneration in respect of the acquisition of Plura.

Costs associated with employment matters are in relation to one-off regulatory claims.

During 2022, there was an isolated cyber incident at one of the Group's businesses, which resulted in temporary disruption to manufacturing and consequently sales in April and May 2022.

Impairment of intangible assets of £2.5m (2022: £2.8m) related to assets associated with the closure of a site within the year and in 2022 is in respect of a customer relationship agreement ending early and impairment of goodwill relates to a 2021 acquisition, (see Note 18).

Amortisation charged relates to intangible assets arising on business combinations.

9. Staff costs

Staff costs (including Directors) comprised:

	2023 £m	2022 £m
Wages and salaries	127.2	128.5
Social security costs	13.4	13.2
Other pension costs	5.4	6.5
	146.0	148.2

The average monthly number of persons employed by the Group by segment was as follows:

	2023	2022
Sustainable Building Solutions	1,500	1,739
Water Management Solutions	737	796
Climate Management Solutions	939	990
Other	120	115
Total – Group	3,296	3,640

10. Directors' remuneration

Details of the Directors' remuneration are set out below:

	2023 £m	2022 £m
Fees	0.5	0.5
Emoluments	2.9	3.1
	3.4	3.6

Further details of Directors' remuneration are provided in the Annual Report on Remuneration. The aggregate amount of gains made by the Directors on the exercise of share options during the year was £0.6m (2022: £0.2m).

11. Finance costs

	2023 £m	2022 £m
Interest on bank loan	11.6	6.2
Debt issue cost amortisation	0.8	0.5
Un-wind of discount on lease liabilities	1.2	0.8
Other finance costs	-	0.1
	13.6	7.6

Annual Report & Accounts 2023

Genuit Group plc

12. Income tax

(a) Tax expense reported in the income statement

	2023 £m	2022 £m
Current income tax:		
UK income tax	11.0	7.7
Overseas income tax	0.2	0.1
Current income tax	11.2	7.8
Adjustment in respect of prior years	(0.4)	(0.5)
Total current income tax	10.8	7.3
Deferred income tax:		
Origination and reversal of temporary differences	(1.9)	0.4
Effects of changes in income tax rates	0.1	1.3
Deferred income tax	(1.8)	1.7
Adjustment in respect of prior years	0.9	(0.1)
Total deferred income tax	(0.9)	1.6
Total tax expense reported in the income statement	9.9	8.9

Details of the non-underlying tax credit of £8.0m (2022: £5.2m) are set out in Note 8.

(b) Reconciliation of the total tax expense

A reconciliation between the tax expense and the product of accounting profit multiplied by the UK standard rate of income tax for the years ended 31 December 2023 and 2022 is as follows:

	2023 £m	2022 £m
Accounting profit before tax	48.4	45.4
Accounting profit multiplied by the UK standard rate of income tax of 23.52% (2022: 19.0%)	11.4	8.6
Expenses not deductible for income tax	1.6	3.4
Non-taxable income	(2.2)	(0.4)
Adjustment in respect of prior years	0.5	(0.6)
Effects of patent box	(1.1)	(1.6)
Effects of changes in income tax rates	0.1	1.3
Effects of super deduction	(0.1)	(1.8)
Effects of other tax rates/credits	(0.3)	-
Total tax expense reported in the income statement	9.9	8.9

The effective rate for the full year was 20.5% (2022: 19.6%). If the impact of non-underlying items is excluded, the underlying income tax rate would be 22.2% (2022: 15.6%).

(c) Deferred income tax

The deferred income tax included in the Group balance sheet is as follows:

	2023 £m	2022 £m
Deferred income tax liabilities/(assets)		
Short-term timing differences:		
- DTL arising on acquired intangible assets	32.9	36.5
- Other short-term timing differences	(1.5)	1.3
Capital allowances in excess of depreciation	23.0	16.9
Share-based payments	(1.3)	(2.1)
Tax losses	(3.0)	(2.5)
	50.1	50.1

12. Income tax continued

The Group offsets tax assets and liabilities if, and only if, it has a legally enforceable right to set off current income tax assets and current income tax liabilities and the deferred income tax assets and deferred income tax liabilities relate to income taxes levied by the same tax authority.

(d) Change in corporation tax rate

On 24 May 2021, legislation was passed which substantively enacted an increase in UK corporation tax rate from 19% to 25% from April 2023. Deferred income tax on the balance sheet at 31 December 2023 was measured at 25%.

(e) Unrecognised tax losses

No deferred income tax has been recognised on non-trading losses and other timing differences of £3.4m (2022: £1.3m) as the Directors do not consider that they will be utilised in the foreseeable future.

13. Earnings per share

Basic earnings per share amounts are calculated by dividing profit for the year attributable to the owners of the parent company by the weighted average number of ordinary shares outstanding during the year. The diluted earnings per share amounts are calculated by dividing profit for the year attributable to the owners of the parent company by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of potential ordinary shares that would be issued on the conversion of all the dilutive share options into ordinary shares.

The calculation of basic and diluted earnings per share is based on the following:

	2023	2022
Weighted average number of ordinary shares for the purpose		
of basic earnings per share	248,182,934	248,001,063
Effect of dilutive potential ordinary shares	1,024,432	2,414,364
Weighted average number of ordinary shares for the purpose		
of diluted earnings per share	249,207,366	250,415,427

Underlying earnings per share is based on the result for the year after tax excluding the impact of non-underlying items of £24.Im (2022: £40.0m). The Directors consider that this measure provides a better and more consistent indication of the Group's underlying financial performance and more meaningful comparison with prior and future periods to assess trends in our financial performance. The underlying earnings per share is calculated as follows:

	2023	2022
Underlying profit for the year attributable to the owners of the parent company (£m)	62.6	76.5
Underlying basic earnings per share (pence)	25.2	30.8
Underlying diluted earnings per share (pence)	25.1	30.5

14. Dividend per share

<u> </u>		
	2023 £m	2022 £m
Amounts recognised as distributions to equity holders in the year:		
Final dividend for the year ended 31 December 2022 of 8.2p per share (2021: 8.2p)	20.3	20.3
Interim dividend for the year ended 31 December 2023 of 4.1p per share (2022: 4.1p)	10.2	10.2
	30.5	30.5
Proposed final dividend for the year ended 31 December 2023 of 8.3p per share (2022: 8.2p)	20.6	20.3

The proposed final dividend is subject to approval by shareholders at the Annual General Meeting and has not been included as a liability in these consolidated financial statements.

At 31 December 2022	52.4	117.5	169.9

Included in freehold land and buildings is non-depreciable land of £17.9m (2022: £18.2m).

During the year the Group revised its depreciation policy for Plant and other equipment. This reduced the depreciation charge by £0.6m. As part of the Group simplification to reduce its operational footprint it undertook the following actions:

- Sold the land and buildings of one of its operating warehouses, the net gain on disposal has been recognised in non-underlying items see (Note 4).
- Exited two freehold land and buildings during the year which have been reclassified to non-current assets held-for-sale at net book value, which is lower than fair value less cost to sell. The properties are marketed as for sale and completion is expected within 12 months of the reporting date.

Capital commitments

At 31 December 2023, the Group had commitments of £7.1m (2022: £2.8m) relating to plant and equipment purchases.

16. Right-of-use assets and lease liabilities

Brand names and customer relationships which arise from business combinations are amortised over their estimated useful lives of five to twenty years. There are two existing brands that have a significant carrying value: Nuaire (£4.0m) and Adey (£23.2m) with an estimated useful life of five and eighteen years respectively. Customer relationships that have a significant carrying value are Adey's relationships with key customers (£73.5m) with an estimated useful life of between nine and eighteen years and Manthorpe (£5.9m) with an estimated useful life of ten years.

17. Intangible assets continued

Impairment testing of goodwill Cash Generating Units (CGUs)

Goodwill is not amortised but is subject to annual impairment testing. Goodwill has been allocated for impairment testing purposes to a number of CGUs which represent the lowest level in the Group at which goodwill is monitored for internal management purposes. The carrying amount of goodwill allocated to each of the CGUs is as follows:

CGU	31 December 2023 £m	31 December 2022 £m
Building Services & International	29.1	30.4
Infrastructure & Landscape	43.6	43.6
Residential Systems	169.6	169.6
Climate & Ventilation	93.7	93.7
Nu-Heat	17.3	17.3
Adey	95.5	92.8
Others	5.3	8.0
	454.1	455.4

At 31 December 2023, £4.5m (2022: £3.2m) of goodwill has been allocated to assets held-for-sale from the Building Services & International CGU, in relation to Polypipe Italia SRL as detailed in Note 19. During the year Surestop was hived up into Adey Innovation and as such the goodwill arising on the acquisition of Surestop was subsequently transferred to the Adey CGU.

From 1 January 2023, reporting segments have been aligned with the Group's Sustainable Solutions for Growth strategy and reorganised into three segments – Sustainable Building Solutions (SBS), Water Management Solutions (WMS) and Climate Management Solutions (CMS). Adey, Nu-Heat and Climate & Ventilation CGUs have been allocated into CMS, Residential Systems and Building Services & International CGUs are allocated into SBS and Infrastructure & Landscape and Ulster CGUs are now reported as WMS.

Key assumptions used for value-in-use calculations;

The recoverable amount of all CGUs are determined from value-in-use calculations, being the net present value of future pre-tax cash flows, discounted at a mid-year position, covering a five-year period. These pre-tax cash flows are based on budgeted cash flows information for a period of one year, construction industry forecasts of growth for the following year and management's forecast of growth between 1.6% to 7.3% for years 3 to 5 (2022: 20% to 5.0%). Terminal growth rates between 2.0% to 2.4% (2022: 2.0% to 2.4%) have been applied beyond this, based on historical macroeconomic performance and projections of the sector served by the CGUs.

A pre-tax discount rate of 13.9% (2022: 12.9%) has been applied in determining the recoverable amounts of CGUs. The pre-tax discount rate is estimated based on the Group's risk adjusted cost of capital.

When assessing for impairment of goodwill, management have considered the impact of climate change, particularly in the context of the risks and opportunities identified within the Task Force on Climate-Related Financial Disclosures Report on pages 36 to 39 of the Strategic Report and have not identified any material short-term impacts from climate change that would impact the carrying value of goodwill. Over the longer term, the risks and opportunities are more uncertain, and management will continue to assess the quantitative impact of risks at each balance sheet date.

Recoverable amounts and sensitivities:

The Group has applied sensitivities to assess whether any reasonably possible changes in assumptions could cause an impairment that would be material to these consolidated financial statements. The application of these sensitivities did not cause an impairment of goodwill.

At 31 December 2022, the Group recognised a £12.0m impairment charge in the Adey CGU, leaving the recoverable amount equal to that of the carrying value. The headroom resulting from the value-in-use calculations at 31 December 2023 indicates that the Adey CGU is sensitive to changes in the key assumptions and management considers that a reasonably possible change in any single assumption could give rise to an impairment of the corresponding carrying amount of goodwill. The detailed sensitivity analysis indicates that the following changes in each of these key assumptions would result in an impairment charge being recognised:

- The pre-tax discount rate increasing to 14.2% from that used in the value-in-use calculations of 13.9%. would give rise to an impairment charge of £4.2m.
- A reduction in the long-term growth rate to 2.0% from that used in the value-in-use calculations of 2.4% would give rise to an impairment charge of £3.8m.
- Average revenue growth rates declining by 0.5 percentage points from that used in the value-in-use calculations would give rise to an impairment charge of £7.5m.
- Gross margin efficiencies are not achieved by 2028 and margin declines by 3 percentage points from that used in the value-in-use calculations would give rise to an impairment charge of £16.1m.

Management has reviewed the forecasts associated with the CGU noting the assumptions used, the sensitivity analysis performed and the ability of the business to adapt to challenging economic environments in which they operate, and is satisfied that no further impairments are necessary at 31 December 2023.

18. Acquisitions

Deferred and contingent consideration recognised on the balance sheet at 31 December in relation to past business combinations comprised:

	31 December 2023 £m	31 December 2022 £m
Deferred consideration on Keytec acquisition	-	0.6
Deferred and contingent consideration on Plura acquisition	8.2	7.4
	8.2	8.0

An amount of £1.8m has been recognised as a non-underlying expense in the Group Income Statement in the year ended 31 December 2023 in respect of the Plura contingent consideration arrangement. This takes the total amount recognised as a liability on the Group balance sheet at 31 December 2023 to £8.2m. A payment of £1.0m was made in relation to this arrangement in December 2023. Accordingly, the aggregate final total amount payable under the contingent consideration is expected to be approximately £9.2m. Contingent consideration was determined based upon the agreed purchase price of the remaining 49% of shares on 8 December 2023. There is no material difference between the cash consideration and the fair value and the final payment was subsequently paid in February 2024.

Acquisition-related cash flows comprised:

	2023 £m	2022 £m
Operating cash flows – settlement of acquisition costs		
Keytec	-	0.1
Plura	-	0.1
	-	0.2

	2023 £m	2022 £m
Investing cash flows – Settlement of deferred and contingent consideration		
Plura	1.0	_
Keytec	0.6	_
Permavoid	-	0.5
	1.6	0.5
	2023 £m	2022 £m
Investing cash flows – acquisition of businesses net of cash at acquisition		
Keytec	-	2.6
	-	2.6

Keyted

On 31 March 2022, the Group acquired 100% of the voting rights and shares of Keytec Geomembranes Holding Company Limited (Keytec), for an initial cash consideration of £2.5m on a cash-free and debt-free basis plus a deferred consideration of £0.6m, which was paid in early 2023. The total cash consideration of £2.9m included a payment for net cash and working capital commitments on completion of £0.4m. Keytec is a supplier and installer of stormwater attenuation products, geomembranes and gas protection products.

No material intangible assets were identified. The goodwill arising on the acquisition primarily represented the technical expertise of the Keytec staff, synergies of companies offering both supply and install services and market share. The goodwill was initially allocated entirely to the Commercial and Infrastructure Systems segment, which is now the Water Management Solutions segment.

Genuit Group plc Annual Report & Accounts 2023

Notes to the Group Financial Statements continued

19. Assets held-for-sale

The following major class of assets and liabilities that have been classified as held-for-sale at the balance sheet date are as follows:

	2023 Fair value £m	2022 Fair value £m
Property, plant and equipment	5.5	2.4
Right-of-use assets	0.3	0.3
Goodwill	4.5	3.2
Trade and other receivables	2.8	1.7
Inventories	4.0	3.1
Assets held-for-sale	17.1	10.7
Trade and other payables	2.6	2.3
Finance lease liabilities	0.2	0.3
Liabilities held-for-sale	2.8	2.6

During the year the Group announced its plan to exit two operational freehold properties (one within the CMS segment and one within the WMS segment). (Both properties have been listed for sale and the Group remains committed to the sale of both, which are expected to be sold within 12 months of the balance sheet date. The proceeds of the disposal are expected to exceed the carrying amount of £3.3m and, accordingly, no gain or loss was recognised on the classification of the property as held-for-sale. After the year end the property within the CMS segment sold, and completed in February 2024.

During 2022 the Group announced its intention to dispose of Polypipe Italia SRL following a strategic review and began marketing the company for sale and presented the net assets as held-for-sale. In 2023 The Group held discussions with several parties who had expressed interest in acquiring the business. However for various, and individually specific reasons, these discussions did not lead to a transaction but the Group continued to proactively market the company for sale. The Group are still in discussions with parties and remain confident that a sale will be achieved in 2024. The proceeds of disposal are expected to exceed the carrying amount of the related net assets and accordingly no impairment losses have been recognised on the classification of Polypipe Italia SRL as held-for-sale.

20. Investments

Details of Group undertakings

Details of the investments in which the Group holds 20% or more of the nominal value of any class of share capital at 31 December 2023 are set out in Note 4 to the Parent Company financial statements.

21 Inventories

	31 December 2023 £m	31 December 2022 £m
Raw materials	22.5	25.3
Work in progress	7.9	9.2
Finished goods	38.8	55.4
	69.2	89.9

All inventories are carried at cost less a provision to take account of slow-moving and obsolete items. The provision at 31 December 2023 was £13.9m (2022: £14.9m).

22. Trade and other receivables

	31 December 2023 £m	31 December 2022 £m
Trade receivables	66.2	60.5
Prepayments	6.8	6.1
Other receivables	0.9	1.5
	73.9	68.1

Trade receivables are non-interest bearing and are generally settled on 30 days' credit.

22. Trade and other receivables continued

Expected credit losses

The Group maintains a substantial level of credit insurance covering a significant proportion of its trade receivables which mitigates against expected credit losses. Therefore, such credit losses are not significant.

The ageing of trade receivables at the balance sheet date was as follows:

	31 December 2023				31 Dece	mber 2022
	Gross £m	Allowance for expected credit losses £m	Net £m	Gross £m	Allowance for expected credit losses £m	Net £m
Not past due	25.8	-	25.8	22.3	_	22.3
Past due 1 to 30 days	34.5	-	34.5	35.3	_	35.3
Past due 31 to 90 days	5.1	(0.1)	5.0	2.0	(0.2)	1.8
Past due more than 90 days	1.5	(0.6)	0.9	1.5	(0.4)	1.1
	66.9	(0.7)	66.2	61.1	(0.6)	60.5

The movements in the allowance for expected credit losses of trade receivables comprised:

	£m
At 31 December 2021	1.4
Acquisition of businesses	0.2
Credited to the income statement during the year	(1.0)
At 31 December 2022	0.6
Charged to the income statement during the year	0.4
Utilised during the year	(0.3)
At 31 December 2023	0.7

23. Cash and cash equivalents

Cash and cash equivalents comprised:

	31 December 2023 £m	31 December 2022 £m
Cash at bank and in hand	17.0	50.0

Cash at bank earns interest at variable rates based on daily bank deposit rates. The Group only deposits cash surpluses with banks that have as a minimum a single A credit rating.

24. Share capital and reserves

Share capital

	31 December 2023		31 December 2022	
	Number*	£	Number*	£
Authorised, allotted, called up and fully paid share capital:				
Ordinary shares of £0.001 each	249	249,170	249	249,170

^{*} Millions of shares

The ordinary shares are voting non-redeemable shares and rank equally as to dividends, voting rights and any return of capital on winding up.

Share premium

On 11 February 2021, the Group conducted a non-pre-emptive placing of 18,704,085 new ordinary shares at £5.15 per share generating gross proceeds of £96.3m with issue costs of £2.7m. Net proceeds in excess of the nominal value of £93.6m have been credited to the share premium account. A further £0.1m of listing fees have been incurred and charged to the income statement in 2021.

Capital redemption reserve

Following the consolidation and subdivision of shares in 2014 the Company's deferred shares were cancelled. In order to maintain the Company's capital, a transfer was made from retained earnings to a capital redemption reserve at that time.

24. Share capital and reserves continued

Own shares

Own shares represent the cost of Genuit Group plc shares purchased in the market and held by the Company, and/or the Employee Benefit Trust (EBT), to satisfy the future exercise of options under the Group's share option schemes.

During the year the Group issued no shares (2022: 1,000,000 shares) to the EBT at the nominal value of £0.001.

At 31 December 2023, the Group held 375 (2022: 375) of its own shares at an average cost of £4.20 (2022: £4.20) per share. The market value of these shares at 31 December 2023 was less than £0.1m (2022: less than £0.1m). The nominal value of each share is £0.001.

The EBT held 921,482 shares at 31 December 2023 (2022: 1,071,188) at an average cost of 0.1p (2022: 0.1p) per share. The market value of these shares at 31 December 2023 was £3.7m (2022: £3.0m). The nominal value of each share is £0.001.

Hedging reserve

The hedging reserve contains the effective portion of the cash flow hedge relationships entered into by the Group in respect of interest rate swaps and forward foreign currency derivatives as discussed in Note 29.

Foreign currency retranslation reserve

The foreign currency retranslation reserve is used to record exchange differences arising from the translation of the financial statements of foreign subsidiaries.

Other reserves

On 7 May 2020, the Group conducted a non-pre-emptive placing of 26,966,300 new ordinary shares at £4.45 per share generating gross proceeds of £120.0m. The placing was undertaken using a cashbox structure. As a result, the Group was able to take relief under Section 612 of the Companies Act 2006 from crediting share premium and instead transfer the net proceeds in excess of the nominal value to other reserves. Advisers' fees of £3.5m have been netted off against the gross proceeds.

Capital management

The primary objective of the Group's capital management is to ensure that it maintains an appropriate capital structure to support its business objectives and maximise shareholder value. The Group regards shareholders' equity and net debt as its capital. The Group's net debt is defined as cash and cash equivalents, loans and borrowings, and lease liabilities. At 31 December 2023, the Group had bank debt of £120.0m (2022: £170.9m), an undrawn committed revolving credit facility of £230.0m (2022: £179.1m), cash of £17.0m (2022: £50.0m), an uncommitted accordion facility of £50.0m (2022: £50.0m), private placement loan notes of £25.0m (2022: £25.0m) with a maturity date of August 2029 and lease liabilities of £23.5m (2022: £23.1m). A key objective of the Group is to maintain sufficient liquidity (cash and committed bank facilities) in order to meet its cash commitments including interest payments due on that debt. No changes were made to the objectives, policies or processes during the years ended 31 December 2023 and 31 December 2022.

Strategic Report

Notes to the Group Financial Statements continued

25. Share-based payments continued

At 31 December 2023, 449,475 (2022: 889,345) share options were exercisable at a weighted average exercise price of £2.20 (2022: £2.34) per share.

Sharesave Plan

Sharesave Plan options were granted to eligible employees on 10 October 2023 at an exercise price of £2.60 per share, a 20% discount to the average share price over the three business days preceding the offer. Participating employees can exercise their options to purchase the shares acquired through their savings plans at the option price after three years. These options have an exercise date of 2026 to 2027.

Long-Term Incentive Plan (LTIP)

LTIP options were awarded to a number of senior managers on 21 April 2023, 18 May 2023 and 22 May 2023. These options have an exercise date of 2026 to 2033. The vesting of each award is subject to the satisfaction of certain performance criteria, of which 25% is based on total shareholder return (the TSR element), 25% is based on sustainability performance (the sustainability element) and 50% is based on earnings per share (the EPS element). Further details of the scheme are provided in the Annual Report on Remuneration.

Deferred Share Bonus Plan (DSBP)

On 21 April 2023, the Executive Directors received an award of shares under the DSBP relating to the 2022 annual bonus.

All these equity-settled, share-based payments are measured at fair value at the date of grant. The fair value determined at the date of grant of the equity-settled, share-based payments is expensed to the income statement on a straight-line basis over the vesting period, based on the Group's estimates of shares that will eventually vest, with a corresponding adjustment to equity. Fair value for the Sharesave Plan options is measured by use of a Black-Scholes model. Fair value of the LTIP options is measured by use of a Monte Carlo model. The expected life used in the models has been adjusted, based on management's best estimate for the effects of non-transferability, exercise restrictions and behavioural considerations.

The assumptions used for each share-based payment were as follows:

	2014 LTIP options granted 21 April 2023	2014 LTIP options granted 18 May 2023	2014 LTIP options granted 22 May 2023	2014 Sharesave options granted 2023

Lease liabilities	23.4	23.1
Deferred and contingent consideration	8.2	8.0
	146.4	155.3

27. Financial liabilities continued

Bank loan

On 10 August 2022, the Group renewed its banking facilities and entered a Sustainability-Linked Loan revolving credit facility agreement for £350.0m with a £50.0m uncommitted accordion facility expiring in August 2027 and a separate agreement for private placement loan notes of £25.0m with an uncommitted £125.0m shelf facility repayable in August 2029. The Group incurred debt issue costs of £3.1m, in respect of entering into both agreements, which have been capitalised and are being amortised to the income statement over the whole term of each facility, respectively.

Interest is payable on the bank loan at SONIA plus an interest margin ranging from 0.90% to 2.75% which is dependent on the Group's ESG targets and the Group's leverage (net debt excluding lease liabilities as a multiple of pro-forma EBITDA) and reduces as the Group's leverage reduces. The interest margin at 31 December 2023 was 1.65% (2022: 1.60%). Pro-forma EBITDA for the year was £114.9m (2022: £120.3m) and is defined as pre-IFRS 16 underlying operating profit before depreciation, amortisation and share-based payment charges, for the 12 months preceding the Balance Sheet date adjusted where relevant to include a full year of EBITDA from acquisitions made during those 12 months.

Interest is payable semi-annually on the loan notes and is fixed at 4.44% per annum for the period of the loan term.

	2023 £m	2022 £m
Pro-forma EBITDA (12 months preceding the Balance Sheet)		
Underlying operating profit	94.1	98.2
Depreciation of property, plant and equipment	19.1	19.4
Amortisation of intangible assets arising on business combinations	0.8	0.2
Un-wind of discount on lease liabilities	(1.2)	(0.8)
Share-based payments charge	2.1	2.9
	114.9	119.9
EBITDA from acquisitions	-	0.2
	114.9	120.1

At 31 December 2023 the Group had available, subject to covenant headroom, £230.0m (2022: £179.1m) of undrawn committed borrowing facilities in respect of which all conditions precedent had been met.

The Group is subject to a number of covenants in relation to its bank loan which, if breached, would result in the bank loan becoming immediately repayable. These covenants specify certain maximum limits in terms of net debt, excluding lease liabilities, as a multiple of pro-forma EBITDA and interest cover. At 31 December 2023, the Group was not in breach of any bank covenants. The covenant position was as follows:

Covenant	Covenant Requirement	Position at 31 December 2023
Interest cover (Underlying operating profit: finance costs excluding debt issue cost amortisation)	>4.0:1	8.2:1
Leverage (Net debt excluding lease liabilities: pro-forma EBITDA)	<3.0:1	1.1:1

The interest cover and leverage covenants remain at 4.0:1 and 3.0:1 respectively, throughout the remaining term of the revolving credit facility to August 2027, though there exists the option to apply to extend the leverage covenant to 3.5:1 for a limited period of time if the Group makes an acquisition.

Reconciliation of liabilities arising from financing activities

	2023 £m	2022 £m
At 1 January	193.1	197.4
Borrowings repaid	(100.9)	(268.3)
Borrowings drawn down	50.0	266.2
Debt issue costs	0.7	(2.2)
At 31 December	142.9	193.1

28. Related party transactions

Compensation of key management personnel (including Directors):

	2023 £m	2022 £m
Short-term employee benefits	4.4	3.3
Share-based payments	1.0	1.7
	5.4	5.0

Key management personnel comprise the Executive Directors, Non-Executive Directors and other key managers in the Group.

29. Financial risk management objectives and policies

The Group's principal financial liabilities comprise loans and borrowings, deferred and contingent consideration, lease liabilities, derivative financial instruments and trade and other payables. The main purpose of these financial liabilities is to finance the Group's operations. The Group has trade and other receivables and cash that are derived directly from its operations.

The Group is exposed to interest rate cash flow, foreign currency exchange, credit and liquidity risk.

The Group's senior management oversees the mitigation of these risks which are summarised as follows:

Interest rate risk

The interest rate on the Group's £350.0m Sustainability-Linked Loan is variable, being payable at SONIA plus a margin. The Group manages its long-term borrowings policy centrally and operates weekly cash flow forecasting to manage its net debt position to ensure exposure to changes in interest rates are minimised where possible.

Interest rate sensitivity

The table below demonstrates the sensitivity to a change in 100 basis point in interest rates on the Group's borrowings which at the relevant reporting dates are not hedged. The analysis assumes all other variables remain constant and the change in rates takes place at the beginning of the financial year and held constant throughout the reporting period, the Group's profit after tax is affected through the impact on interest rate borrowings as follows:

	Effect on profit after tax
Change in interest rate	£m
2023	
Increase of 100 basis points	(8.0)
Decrease of 100 basis points	0.8
2022	
Increase of 100 basis points	(1.6)
Decrease of 100 basis points	0.6

After the balance sheet date, the group entered into an interest rate swap fixed for two years on £25.0m of the Group RCF with a fixed interest fate of 4.154%.

Foreign currency exchange risk

Foreign currency exchange risk is the risk that the fair value of a financial instrument or future cash flows will fluctuate because of changes in foreign currency exchange rates. The Group's exposure to the risk of changes in foreign currency exchange rates relates primarily to the Group's operating activities where the revenue or expense is denominated in a currency other than the functional currency of the entity undertaking the transaction.

The Group enters into forward foreign currency exchange contracts for the purchase and sale of foreign currencies in order to manage its exposure to fluctuations in currency rates, primarily in respect of US Dollar and Euro receipts and payments.

Foreign currency exchange sensitivity

The table below demonstrates the sensitivity to a 10% change in the Euro exchange rate versus Pounds Sterling, the presentational currency of the Group used for translation purposes, on the net assets and profit after tax of the Group. The Group's exposure to foreign currency exchange rate changes for all other currencies is not material.

Change in exchange rate	Effect on net assets £m	Effect on profit after tax £m
2023		
10% strengthening of Pounds Sterling: against Euro	(1.2)	-
10% weakening of Pounds Sterling: against Euro	1.4	-
2022		
10% strengthening of Pounds Sterling: against Euro	(1.0)	-
10% weakening of Pounds Sterling: against Euro	1.3	_

29. Financial risk management objectives and policies continued

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily for trade receivables) and from its financing activities, including cash deposits with banks.

Trade receivables

Customer credit risk is managed by each subsidiary subject to the Group's established policy, procedures and controls relating to customer credit risk management. Credit quality of the customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables are regularly monitored and any shipments to major export customers are generally covered by letters of credit or other forms of credit insurance.

The requirement for impairment is analysed at each balance sheet date on an individual basis for major clients. Additionally, a large number of minor receivables are grouped into homogeneous groups and assessed for impairment collectively. The calculation is based on actually incurred historical data, adjusted for forward looking information. The maximum exposure to credit risk at the balance sheet date is the carrying amount of each class of financial assets as disclosed in Note 22.

The Group does not hold collateral as security. The Group evaluates the concentration of risk with respect to trade receivables as low. At 31 December 2023, 44.3% (2022: 53.0%) of net trade receivables were covered by credit insurance which is subject to the normal policy deductibles.

Financial instruments and cash deposits

The Group maintains strong liquidity through cash balances and deposits of £17.0m and its undrawn committed revolving credit facility £230.0m at 31 December 2023, which matures in August 2027 (with one further uncommitted annual renewal through to November 2028 possible).

Credit risk arising from cash deposits with banks is managed in accordance with the Group's established treasury policy, procedures and controls. Deposits of surplus funds are made only with banks that have as a minimum a single A credit rating. The Group's maximum exposure to credit risk for the components of the balance sheet at 31 December 2023 and 31 December 2022 is the carrying amounts as illustrated in Note 23.

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The table below summarises the maturity profile of the Group's financial liabilities based on contractual undiscounted payments:

31 December 2023	<3 months £m	3 to 12 months £m	1 to 5 years £m	> 5 years £m	Total £m
Bank Ioan – principal	2.6	7.4	155.0	-	165.0
Private placement loan notes	-	1.1	4.4	25.0	30.5
Other financial liabilities:					
Trade and other payables	114.8	-	-	-	114.8
Deferred and contingent consideration	8.2	_	-	-	8.2
Forward foreign currency derivatives	1.4	_	-	-	1.4
Lease liabilities	1.7	4.7	17.8	6.4	30.6
	128.7	13.2	177.2	31.4	350.5

The interest payments on the Sustainability-Linked Loan would be £8.2m per year if the interest rate plus margin remained at 6.8% and the level of debt did not change from the balance sheet date.

31 December 2022	<3 months £m	3 to 12 months £m	1 to 5 years £m	> 5 years £m	Total £m
Bank loan – principal	2.4	5.7	214.7	_	222.8
Private placement loan notes	_	1.1	4.4	27.2	32.7
Other financial liabilities:					
Trade and other payables	124.2	_	_	_	124.2
Deferred and contingent consideration	_	_	8.0	_	8.0
Forward foreign currency derivatives	0.9	_	_	_	0.9
Lease liabilities	1.3	3.7	14.9	10.4	30.3
	128.8	10.5	242.0	37.6	418.9

29. Financial risk management objectives and policies continued

Fair values of financial assets and financial liabilities

The book value of trade and other receivables, trade and other payables, cash balances, bank loan and other liabilities equates to fair value.

The table below sets out the Group's accounting classification of its other financial liabilities and their carrying amounts and fair values:

	Carrying value £m	Fair value £m
Forward foreign currency derivatives (designated as hedging instruments)	_	_
Interest-bearing loans and borrowings due after more than one year (designated as financial liabilities measured at amortised cost)	142.9	142.9
Deferred and contingent consideration (designated as financial liabilities at FVTPL)	8.2	8.2
Lease liabilities (designated as financial liabilities measured at amortised cost)	23.4	23.4
Total at 31 December 2023	174.5	174.5
	Carrying value £m	Fair value £m
Forward foreign currency derivatives (designated as hedging instruments)	_	_
Interest-bearing loans and borrowings due after more than one year (designated as financial liabilities measured at amortised cost)	193.1	193.1
Deferred and contingent consideration (designated as financial liabilities at FVTPL)	8.0	8.0
Lease liabilities (designated as financial liabilities measured at amortised cost)	23.1	23.1

The fair values were determined as follows by reference to:

- Forward foreign currency derivatives: quoted exchange rates.
- Deferred and contingent consideration: Directors' assessment of the likelihood that financial targets will be achieved (see Note 18).
- Lease liabilities: present value of lease payments to be made over the lease terms.

Fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: other techniques for which all inputs which have a significant effect on the recognised fair value are observable, either directly or indirectly; and
- Level 3: techniques which use inputs which have a significant effect on the recognised fair value that are not based on observable market data.

The fair values disclosed above, with the exception of deferred and contingent consideration which is categorised as Level 3, all relate to items categorised as Level 2.

There have been no transfers in any direction between Levels 1, 2 or 3 in the years ended 31 December 2022 and 2021.

Directors' Responsibilities Statement

In relation to the parent company financial statements

The Directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable UK law and regulations.

UK Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have elected to prepare the financial statements in accordance with UK-Adopted International Accounting Standards (IFRSs).

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements the Directors are required to:

- select suitable accounting policies in accordance with IAS 8, Accounting Policies, Changes in Accounting Estimates and Errors, and then apply them consistently
- make judgements and accounting estimates that are reasonable and prudent
- present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information
- provide additional disclosures when compliance with the specific requirements in IFRSs is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the Company's financial position and financial performance
- state whether IASs in conformity with the requirements of the Companies Act 2006 have been followed, subject to any material departures disclosed and explained in the financial statements
- prepare the financial statements on the going concern basis unless it is appropriate to presume that the Company will not continue in business

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Annual Report & Accounts 2023

Genuit Group plc

Notes to the Company Financial Statements

For the year ended 31 December 2023

1. Authorisation of financial statements

The parent company financial statements of Genuit Group plc (formerly Polypipe Group plc) (the 'Company') for the year ended 31 December 2023 were authorised for issue by the Board of Directors on 12 March 2024 and the balance sheet was signed on the Board's behalf by Joe Vorih and Tim Pullen.

Genuit Group plc is a public limited company incorporated and domiciled in England and Wales. The principal activity of the Company is that of a holding company.

2. Summary of significant accounting policies

The basis of preparation and accounting policies used in preparing the historical financial information for the year ended 31 December 2023 are set out below. These accounting policies have been consistently applied in all material respects to all the periods presented.

2.1 Basis of preparation and statement of compliance with IFRSs

The Company financial statements have been prepared in accordance with UK-adopted International Accounting Standards (UK-adopted-IAS).

The accounting policies which follow set out those policies which apply in preparing the financial statements for the year ended 31 December 2023.

The Company's financial statements have been prepared on a historical cost basis. The financial statements are presented in Pounds Sterling and all values are rounded to one decimal place of a million (£m) unless otherwise indicated. No income statement or statement of comprehensive income is presented by the Company as permitted by Section 408 of the Companies Act 2006. The results of Genuit Group plc are included in the consolidated financial statements of Genuit Group plc.

2.2 Going concern

The accounting policy for going concern is consistent with that of the Group as detailed on page 163 in Note 2.2.

2.3 Investments

Investments in subsidiary undertakings are held at historical cost less any applicable provision for impairment.

2.4 Share-based payments

The accounting policy for share based payments is consistent with that of the Group as detailed on page 169 in Note 2.22.

Where the Company is settling an equity settled share based payment transaction in which one of its subsidiaries is the entity receiving the goods or service, the parent company accounts for the cost as an addition to the cost of its investment in the employing subsidiary.

2.5 Cash dividend

The accounting policy for cash dividend is consistent with that of the Group as detailed on page 169 in Note 2.23.

2.6 Own shares

The Company operates an employee benefit trust (EBT). The Company, and/or the EBT, holds Genuit Group plc shares for the granting of Genuit Group plc shares to employees and Directors. These shares are recognised at cost and presented in the balance sheet as a deduction from equity. No profit or loss is recognised in the income statement on the purchase, sale, issue or cancellation of these shares. No dividends are earned on these shares.

2.7 Financial instruments

The accounting policy for financial instruments is consistent with that of the Group as detailed on page 167 in Note 2.15. Expected credit loss (ECL) calculations are considered annually for amounts owed by subsidiary undertakings, using the general approach required under IFRS 9. ECLs are a probability weighted estimate of credit losses based on the Company's historical credit loss experience adjusted for debt specific and forward looking factors. Under the general approach ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk, 12 month ECLs are recognised. For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life (lifetime ECLs).

3. Dividend per share

Please refer to Note 14 on page 176 of the Group financial statements for reference to the Dividend per share.

4. Investments

	Shares in subsidiary undertakings £m
Cost	
At 1 January 2022	245.5
Additions – share-based payments	1.4
At 31 December 2022	246.9
Additions – share-based payments	1.2
At 31 December 2023	248.1
Net book value	
At 31 December 2023	248.1
At 31 December 2022	246.9
At 1 January 2022	245.5

In 2023, an adjustment in respect of share-based payments of £1.2m (2022: £1.4m) was made to shares in subsidiary undertakings, representing the financial effects of awards by the Company of options over its equity shares to employees of subsidiary undertakings. The total contribution to date was £8.9m (2022: £7.7m).

- * The shares in the undertakings marked with an asterisk are held by subsidiary undertakings.
- [†] These companies are excluded from the obligation to carry out the audit required under Section 479A of the Companies Act 2006 because data in the accounts of these companies shall be guaranteed by Genuit Group plc under Section 479C of the Companies Act 2006.

5. Amounts owed by subsidiary undertakings and other receivables

	31 December 2023 £m	31 December 2022 £m
Amounts falling due within one year:		
Amounts owed by subsidiary undertakings	-	189.9
Deferred income tax assets	-	0.7
Prepayments	1.2	-
	1.2	190.6
Amounts falling due after one year:		
Deferred income tax assets	0.6	-
Amounts owed by subsidiary undertakings	189.9	-
	190.5	-

No material allowance for expected credit losses is deemed necessary in respect of amounts owed by subsidiary undertakings. These have been reclassified as long-term receivables for the current year as there is no intent to settle within 12 months of the balance sheet date. It is considered that this reclassification does not give rise to any further credit risk in relation to the amounts owed by subsidiary undertakings.

6. Amounts owed to subsidiary undertakings and other payables

	31 December 2023 £m	31 December 2022 £m
Amounts owed to subsidiary undertakings	121.5	85.0
Other payables	1.4	1.3
	122.9	86.3

7. Share capital and reserves

Please refer to Note 24 of on page 182 of the Group Financial statements for reference to Share capital and reserves.

8. Profit for the financial year

Genuit Group plc has not presented its own Income Statement as permitted by Section 408 of the Companies Act 2006. The loss for the year dealt with in the financial statements of the Company was £6.1m (2022: £6.6m loss for the year).

The only employees remunerated by the Company were the Directors of the Company. Remuneration paid to the Directors is disclosed in Note 10 to the Group's consolidated financial statements.

Amounts paid to the Company's auditor in respect of the audit of the financial statements of the Company are disclosed in Note 7 to the Group's consolidated financial statements.

Fees paid to the auditor for non-audit services to the Company itself are not disclosed in the individual financial statements of the Company because the Group's consolidated financial statements are required to disclose such fees on a consolidated basis. These are disclosed in Note 7 to the Group's consolidated financial statements.

9. Related party transactions

The following table provides the analysis of transactions that have been entered into with related parties:

	31 De	31 December 2023		31 December 2022		
	Recharges from related parties £m	Amounts owed to related parties £m	Recharges to related parties £m	Amounts owed to related parties £m

Underlying cash conversion (%)	87.7%	57.4%	54.6%	83.6%	84.3%

Alternative Performance Measures

1. Underlying performance

Underlying profit and earnings measures exclude certain non-underlying items (which are detailed in Note 4) and, where relevant, the tax effect of these items. The Directors consider that these measures provide a better and more consistent indication of the Group's underlying financial performance and more meaningful comparison with prior and future periods to assess trends in the Group's financial performance.

2. Underlying cash conversion

Underlying operating cash conversion is defined as cash generated from operations, adjusted for non-underlying cash items, after movement in net working capital and capital expenditure net of underlying proceeds from disposals of property, plant and equipment and leases divided by underlying operating profit.

	2023	2022	2021	2020	2019
Leverage ³	£m	£m	£m	£m	£m

Return on Capital Employed (ROCE)	11.9%	12.1%	12.0%	8.0%	15.0%

3. Leverage

Leverage is defined as net debt divided by proforma EBITDA (both are reconciled in Note 11). Net debt within the leverage calculation is defined as loans and borrowings net of unamortised issue costs less cash and cash equivalents, excluding the effects of IFRS 16.

4. Pro-forma EBITDA

Pro-forma EBITDA is defined as pre-IFRS 16 underlying operating profit before depreciation, amortisation and share-based payment charges, for the 12 months preceding the balance sheet date, adjusted where relevant, to include a full year of EBITDA from acquisitions made during those 12 months.

Key Performance Indicators

5. Return on Capital Employed

Return on capital employed is the ratio of underlying operating profit, adjusted for the full year benefit from acquisitions during the year, where relevant, to net assets excluding loans and borrowings, cash and cash equivalents and taxation.
